IMPIANTO DI RISCALDAMENTO
SCHEMA GENERALE

RIS. 008

PROGETTO APPROVATO CON DELIBERA DI GIUNTA COMUNALE N. 102/2015

The diagram illustrates a comprehensive heating system for a school building. At the top right, a boiler unit labeled "GENERATORE DI CALORE" with a capacity of 232,000 Watt is shown. A network of pipes, color-coded in shades of blue and green, distributes heat throughout the building. The system is organized into four main levels:
 - **Piano secondo** (Second Floor): Features radiators 1-11 and 23-27.
 - **Piano primo** (First Floor): Features radiators 12-15 and 28-32.
 - **Piano rialzato** (Raising Floor): Features radiators 16-19 and 33-36.
 - **Piano seminterrato** (Basement): Features radiators 20-22 and 37-40.
 Pipes are labeled with numbers indicating different sections or pressure zones: 2065, 2080, 2028, 2050, 2040, 2032, and 2038. The diagram also shows various valves, flow indicators, and a central control unit.
